

**BRAINSTORMING AND PLANNING TOOL:  
CLASSROOM MANAGEMENT MODEL NOTES**

What type of environment do I want to create in my classroom or what types of skills and behaviors do I want to develop in my students? What is my general approach?
How will I arrange my physical space? What effects will this have on teaching and on management?
How will I manage resources, including technology (i.e., enabling students to use computers in the classroom, procedures for using computer lab, etc.—see INTEL 10.02)?
What preventative strategies will I use in my classroom?
What strategies will I use during lessons to help keep students on task?
How will I handle serious disruptions that require more intervention?
